

Profile

Product manager and learning experience designer with six years of leading learning design and curriculum teams, and product experience in fintech and embedded credit. I build customer-centric products and learning programs that are tested with real users, own delivery end to end, and coordinate cross-functional teams to get things shipped.

Experience

Product Strategist

Educate | Flagship product EXP, running in Ugandan secondary schools

- Manage a team of 3 designers creating learning content for scholars and training material for the mentors who train them, using the backward design framework.
- Own Training of Trainers readiness ahead of each pre-term mentor training, surfacing early feedback so curriculum changes are tested before scholars learn them.
- Scholars who complete the program are 45% more likely to hit their life goals, whether educational or entrepreneurial.
- Safeguarding built into ToT sessions and the curriculum so scholars know the escalation pathways.

Product Manager

Kyosk | Internal tools and credit for informal retailers

- Joined during the ERPNext launch period and owned mitigation of extensive post-launch bugs on the company's core ERP.
- Managed integration stakeholders, including tax authorities in Kenya, Uganda and Tanzania.
- Brought purchasing and HR onto ERPNext, including end-to-end employee lifecycle management.
- Worked on initiatives helping informal retailers access credit to buy FMCG, owning delivery end to end.

Product Manager

Proto Energy | LPG cylinders on credit for roadside retailers

- Prioritized and led a backend re-engineering that raised uptime from 85% to 98%.
- Led the team that built a pre-order dashboard and a mini app on the Safaricom M-Pesa app, lifting monthly recurring revenue by more than 8%.
- Led third-party tracker integration on LPG trucks and managed the Fleetio relationship; documented new SOPs after system rollouts.

Classroom and Curriculum Team Lead

Moringa School and Accelerate bootcamps

- Led classroom and curriculum teams, meeting industry leaders such as CTOs for feedback on graduates they had hired to improve the program.
- Hiring rate above 80% at the time of leaving Moringa School.

Learning Design and Curriculum Leadership

Andela

- Led learning design and curriculum work, with quality control and testing changes with learners as a core part of the role.

Skills

Product management

- Product strategy and prioritization
- Requirements and end-to-end delivery
- Fintech and embedded credit
- Stakeholder and vendor management
- Systems rollout and SOP documentation
- Technical writing

Learning experience design

- Backward design
- Curriculum development
- Training of Trainers (ToT)
- Learner testing and quality control
- Experiential learning design
- Leading design teams
